

RESILOC

Project Presentation

EnviroRisks 2020 / Sofia BG

Karsten Uhing

Project specific focus

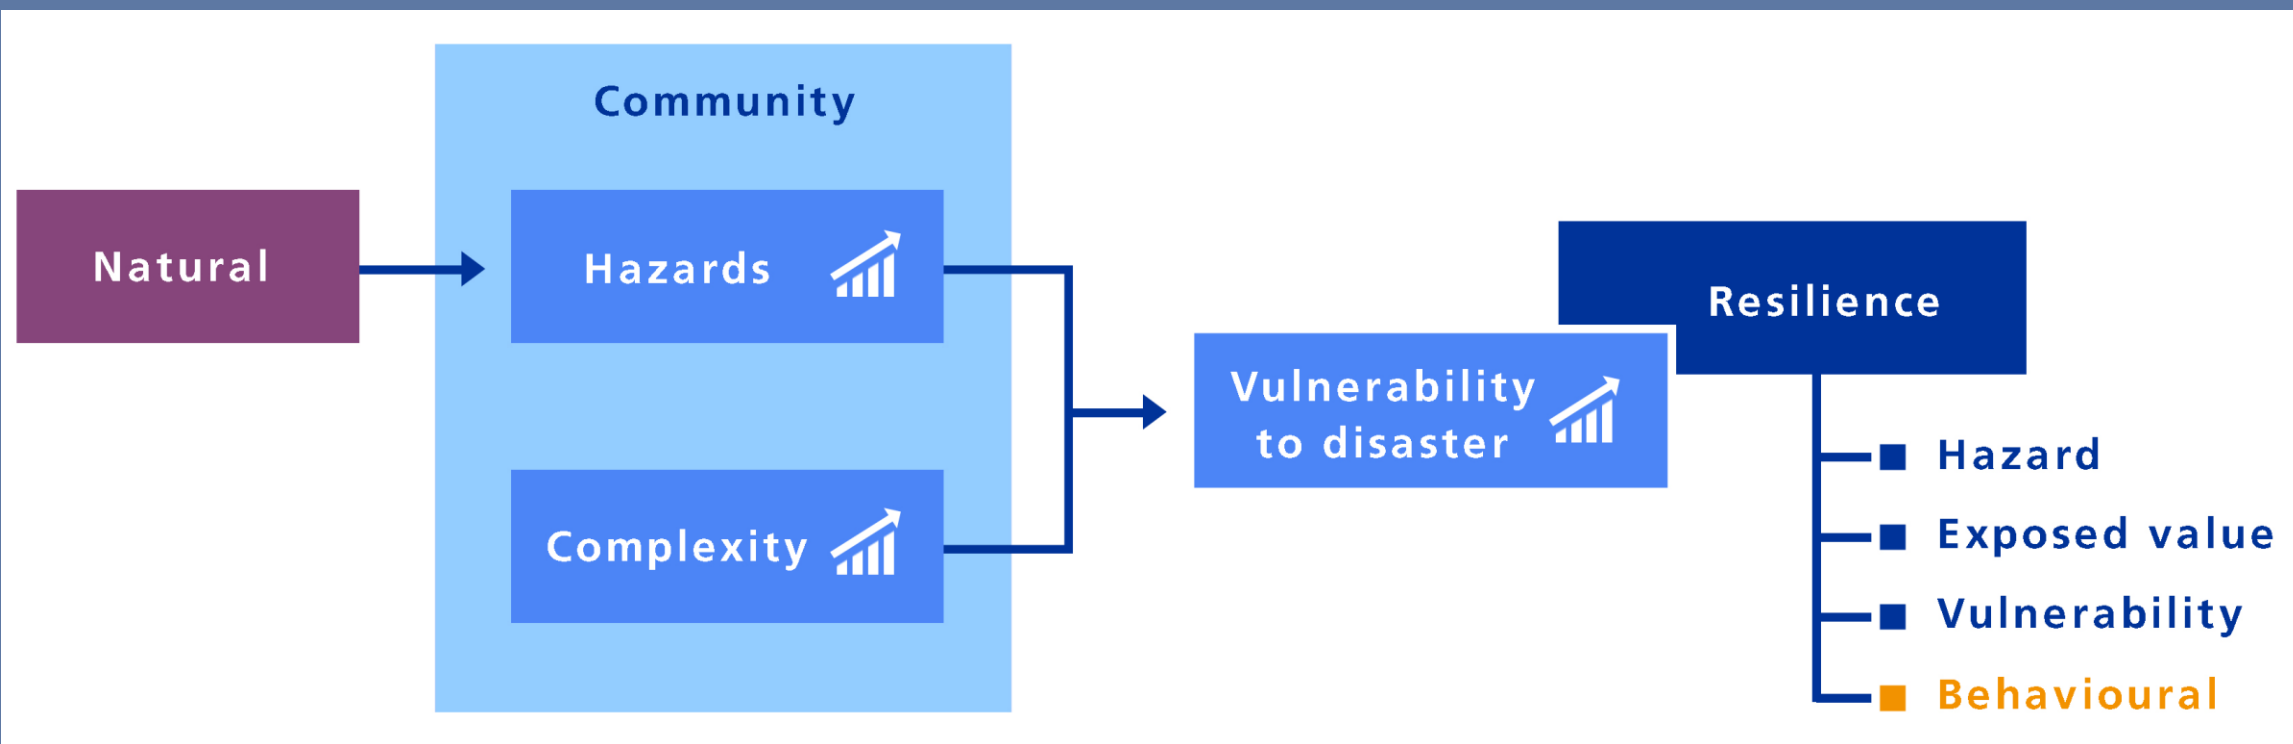

Increase **understanding** of resilience in local communities

Generate strategic tools **empowering** local actors to assess the resilience of their communities and identify actions to increase it.

Research to Innovation

Why communities need to think about resilience?

Who are the Partners?

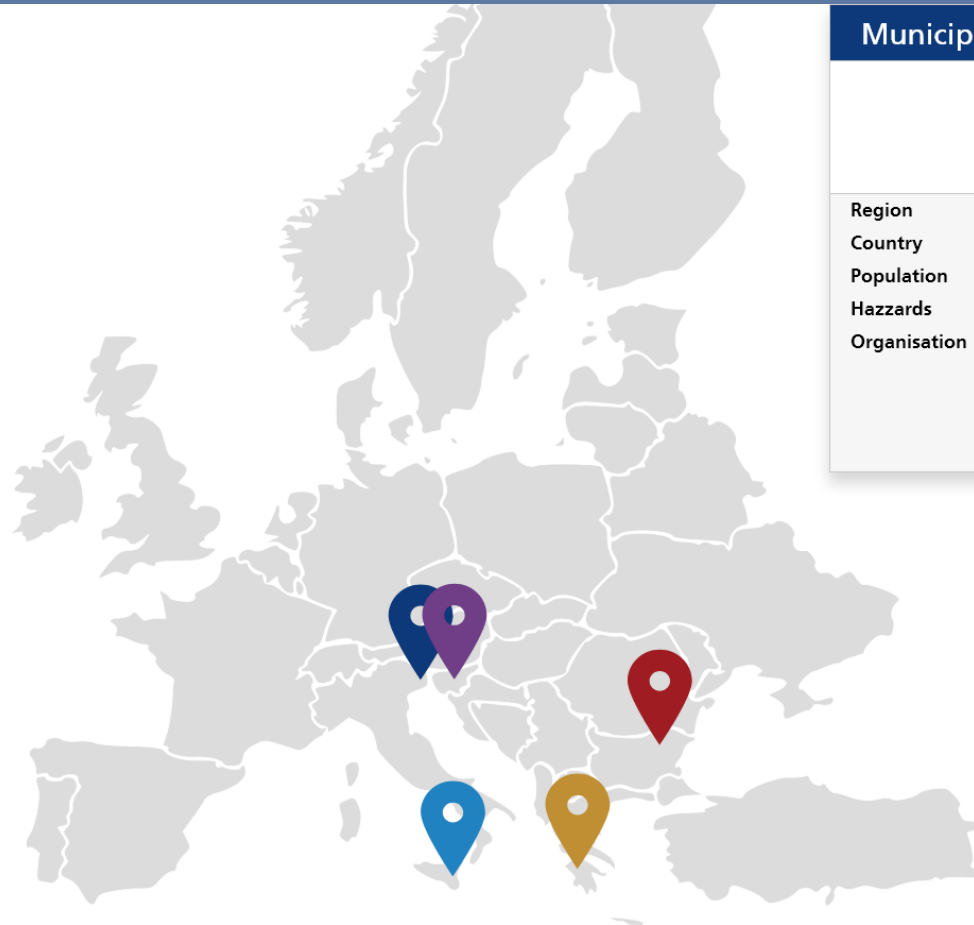

The projects consortium includes

- 9 Research and development organisations
- 4 Local DRR organisations and emergency management experts
- 3 Partner Communities

The results are validated through

- 5 Community based validation points

Validation Points

© Fraunhofer IML

Municipality of Gorizia

Region Friuli Venezia Giulia
Country Italy
Population 35.000
Hazzards earthquakes, floods
Organisation Istituto di Sociologia Internazionale - Institute of International Sociology Gorizia

Community of Kamnik

Region North of Slovenia
Country Slovenia
Population 30.000
Hazzards earthquakes, floods
Organisation Administration of the Republic of Slovenia for Civil Protection and Disaster Relief, Ministry of Defence(ACPD)

Tetovo Village

Region Province of Ruse in North-central Bulgaria
Country Bulgaria
Population 2.000
Hazzards wildfires, snowstorms
Organisation Bulgarian Red Cross (BRC)

City of Catania

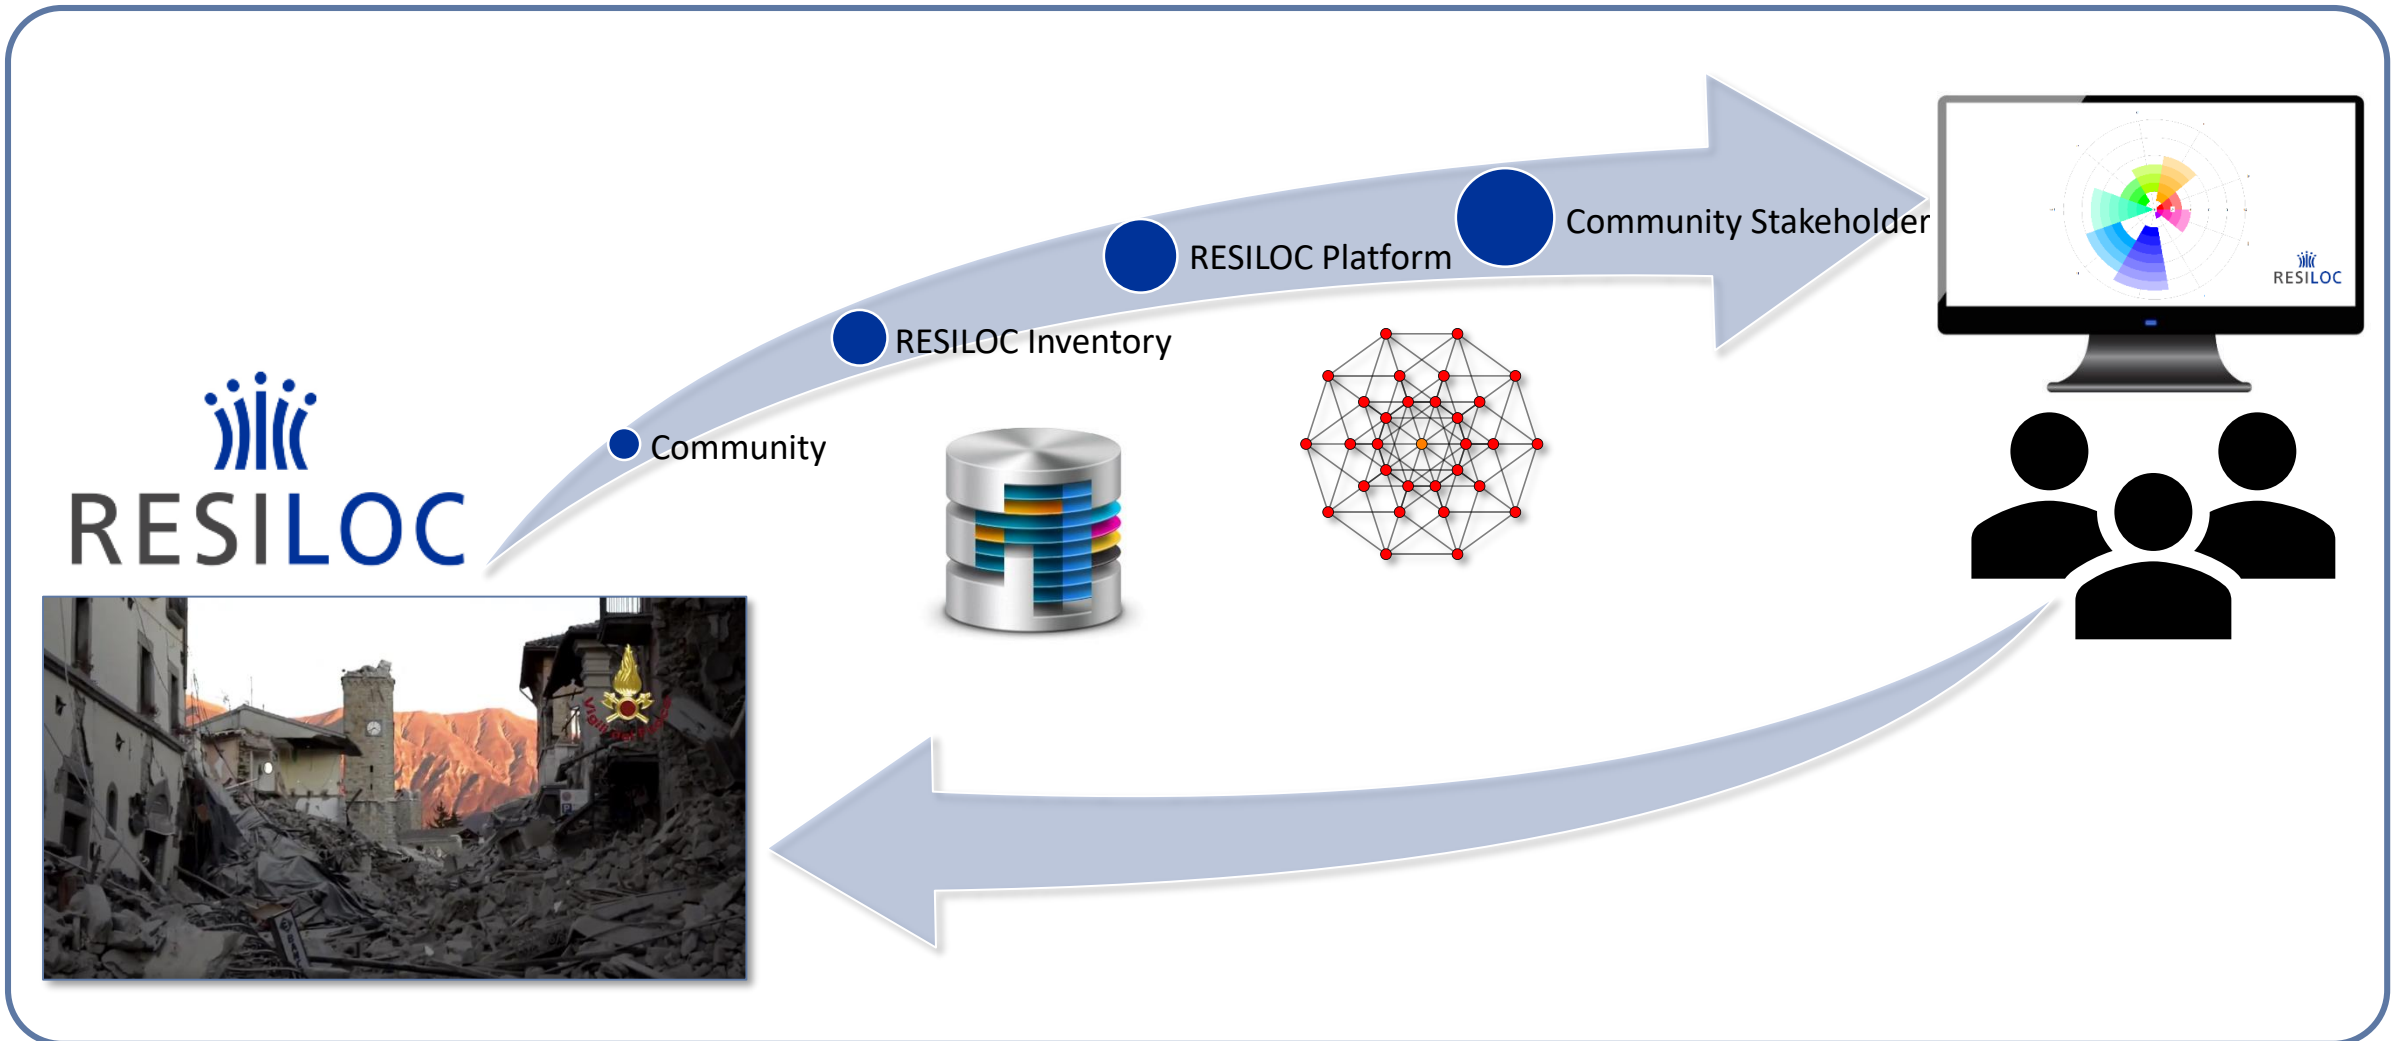

Region Autonomous Region of Sicily
Country Italy
Population 311.000
Hazzards earthquakes, flash floods
Organisation Dipartimento della Regione Siciliana Protezione Civile (DRPC)

Province of West Achaia

Region West Greece
Country Greece
Population 26.000
Hazzards seaside forest fires, earthquakes
Organisation seaside forest fires, earthquakes

The RESILOC concept (Vision)

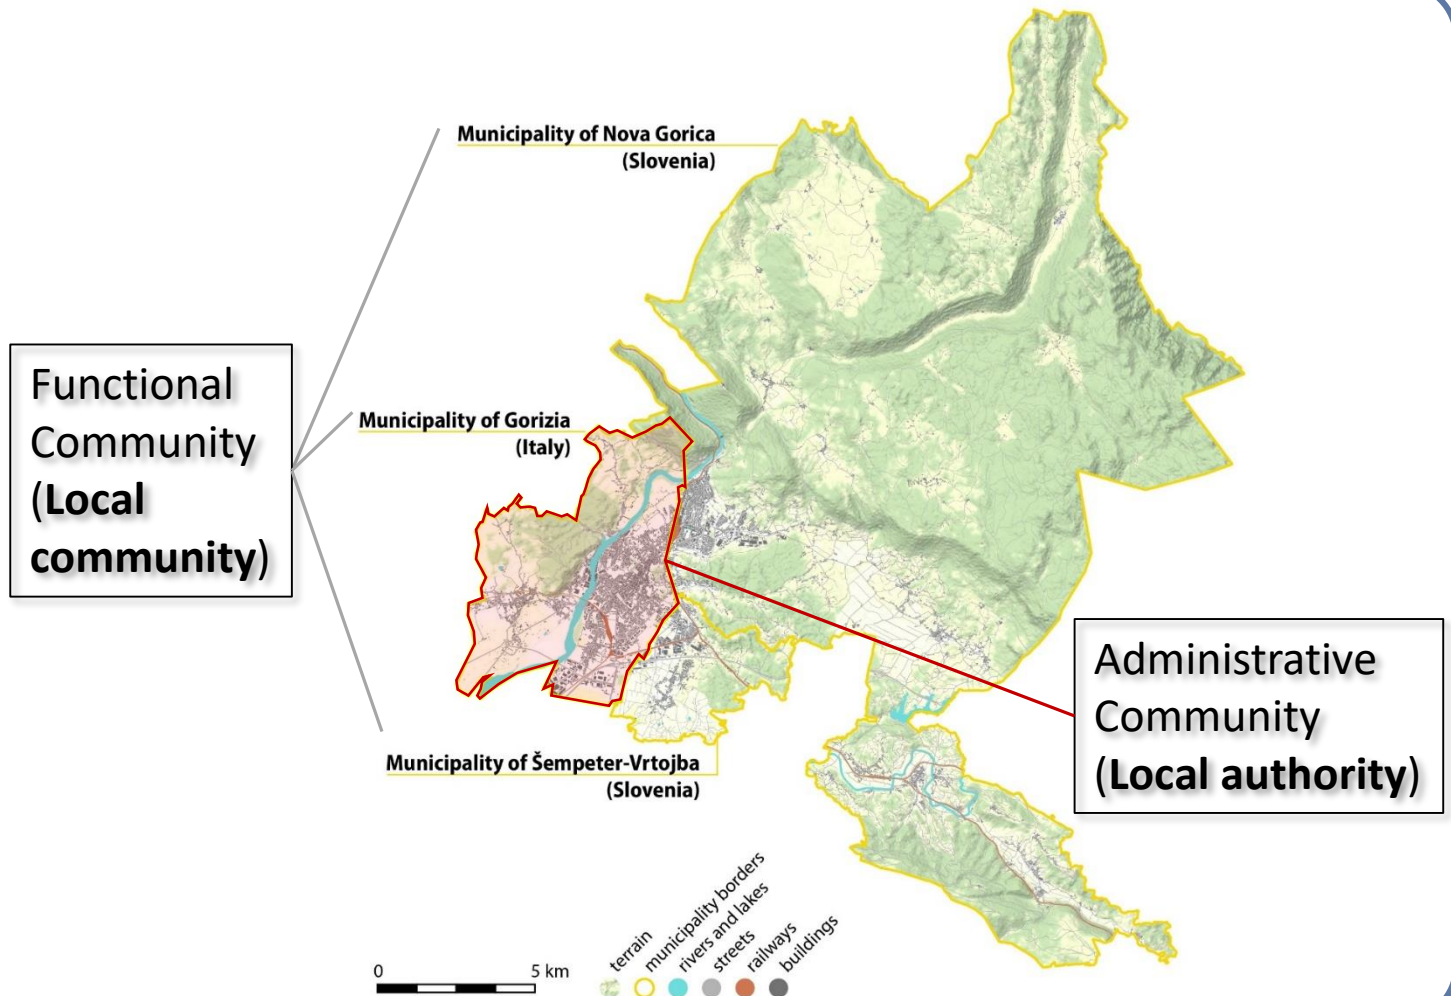

Who are the users of the solution?

3 Levels of Users

1. Community Stakeholders (user)
Typically people who can make strategic decisions within a community hence in an administrative Framework (**local authority**)
2. Emergency Managers (actor)
Responsible to act along prevention and response measures which are influenced by the strategic output generated from the tool.
3. Citizens (beneficiaries)
Provide input; do not operate the tool yet ultimate benefit from its use.
(social media) receive info (App)

What needs are addressed? (High Level)

Community stakeholders need:

to reduce risks and impact from disasters on their community

to describe the resilience of their community in a valid, objective and reliable way

A set of tools and methodologies that form a consolidated layer of knowledge and practices

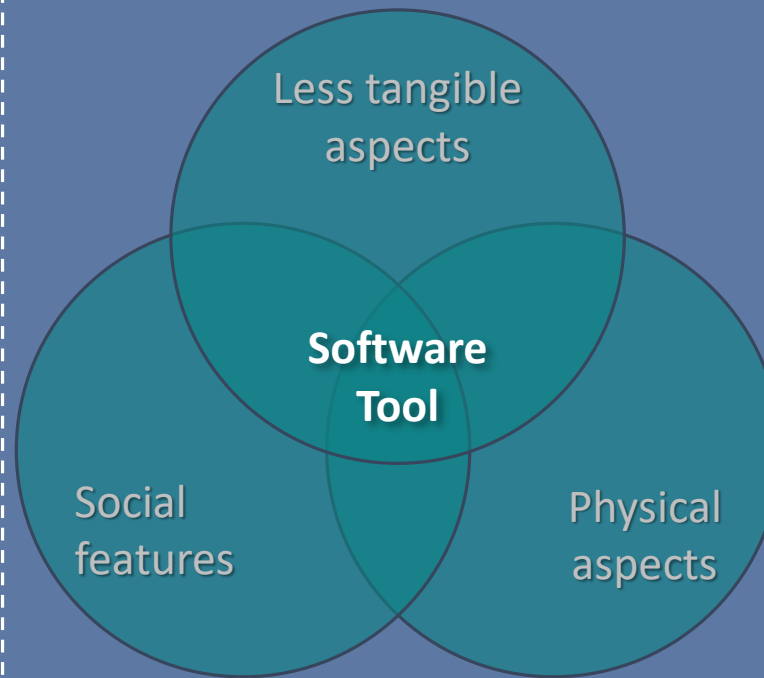

What will be the added value?

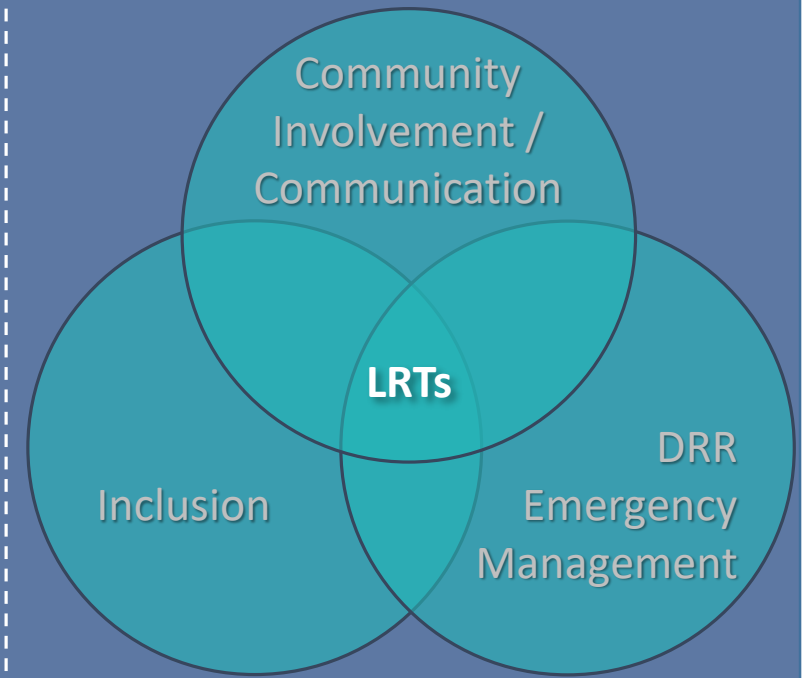

Holistic Assessment

Starting point for developing improvement strategies

Community-specific resilience profile.

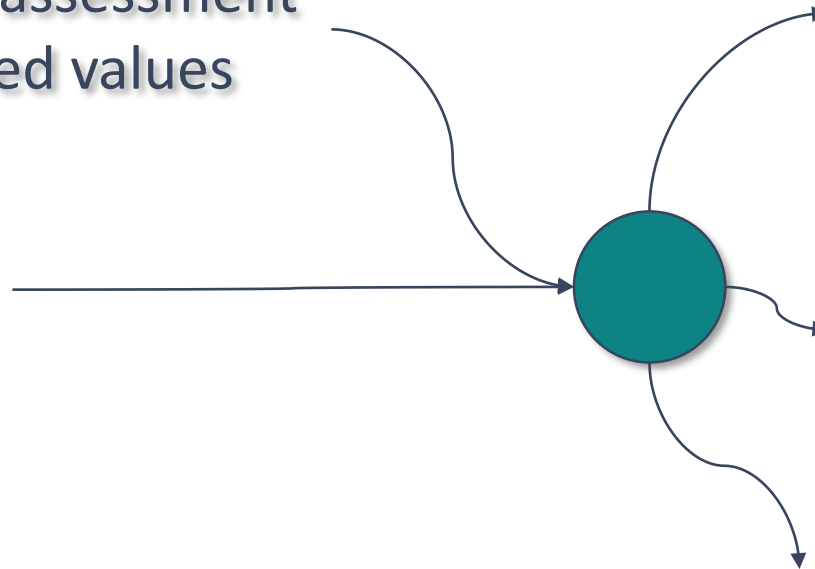

Activate local resilience capacities

Project Achievements

Methodology for the assessment
vulnerability & exposed values

First analysis of
behavioural aspects

Establishment of
Local Resilience Teams (LRTs)

Design of
the inventory

„Hyper Cube“ concept
(7 dimensions of local resilience)

RESILOC

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 833671
